## THE DIPTERAN FAUNA OF BERMUDA.

By CHARLES W. JOHNSON.

Since publishing a list of the Diptera of Bermuda in 1904, (Psyche, vol. XI, pp. 76-80), I have received a number of specimens from Professor Trevor Kincaid, collected in the summer of 1905, and from Mr. Frank Morton Jones, collected December, 1908-May, 1909, and Dr. Reynold A. Spaeth, collected in the summer of 1910. The material thus obtained at various seasons of the year together with the notes kindly furnished by Mr. Jones, greatly increase our knowledge of the Diptera of the Islands. The study of this material has brought out many interesting points in distribution, some of the species derived from the mainland having become either slightly or decidedly differentiated.

The previous list contained about fifty species. Little of the data has been repeated, although all of the species are included in the following list, which contains about ninety-five species.

### TIPULIDAE.

*Tipula costalis* Say. "This fly was abundant at Paget Marsh in February and March, but seemed to completely disappear later." (F. M. Jones).

*Dicranomyia liberta* Osten Sacken. July 7, at light, (Kincaid), Feb. 14 (F. M. Jones).

*Gonomyia* (*Leiponeura*) *pleuralis* Will. This seems to be the most common Tipulid and the one previously recorded as *Dicranomyia distans*, Osten Sacken. It was taken by Professor Kincaid, July 5 and 20, and by Mr. F. M. Jones, Feb. 19 and May 6 and 8.

*Limnophila insularis* sp. nov. Fig. 2.

Fig. 1

Fig. 2.

This species has a general resemblance to *L. recondita* Osten Sacken. The antennæ in both sexes are of equal length, light yellow, flagellum dark brown, the verticilli much shorter than in *L. recondita*. Head blackish, covered with a greyish bloom. Thorax shining brown, pleura dull yellow with a greyish bloom. Abdomen dark brown,

*Aciura insecta* Loew. June 26 (Kincaid); Spanish Point, July 5th (Spaeth).

*Ensina picciola* Bigot, (*Trypeta humilis* Loew). Abundant in sweep-net, December 8 and 29 and May 17 (F. M. Jones). Road from Hamilton to Grasmere June 26 and Spanish Point July 5 (Spaeth).

## SEPSIDÆ.

*Sepsis violacea* Meigen. "Common January 21 and April 29 (F. M. Jones); June 30 and July 29 (Kincaid); Spanish Point, July 5 (Spaeth).

*Piophilha casei* Linné. The cheese fly. Recorded by Prof. Verrill.

## EPHYDRIDÆ.

*Mosillus nana* Walker? (*Ephydra nana* Walker, Trans. Ent. Soc., London, N. Ser. IV; 234, 1857). July 30 (Kincaid); Spanish Point, July 5 (Spaeth).

*Ephydra austrina* Coquillett. One specimen collected by C. A. Davis.

## OSCINIDÆ.

*Hippelates plebeius* Loew. June 28 and 30 (Kincaid); Agar's Island, June 18 (Spaeth).

*Hippelates pusio* Loew. July 12 (Kincaid).

*Oscinis coxendix* Fitch. Common: June 30 and July 12-18 (Kincaid); February 4 (F. M. Jones); near Hamilton, June 26 and Spanish Point, July 5 (Spaeth).

*Oscinis trigramma* Loew. July 11, 15 and 26 (Kincaid).

*Oscinis umbrosa* Loew. Common, June 25 to July 29 (Kincaid).

## DROSOPHILIDÆ.

*Drosophila adusta* Loew. July 25, 29 (Kincaid); February 4 (F. M. Jones).

*Drosophila ampelophila* Loew. January 7 (F. M. Jones).

*Drosophila repleta* Wollaston, (*D. punctulata* Loew, Berl. Ent. Zeits., VI, 232, 1862; *D. adspersa* Mik, Wien. Ent. Zeitzg. V. 328, 1886.) January 1 and May 6 (F. M. Jones).

*Paratissa pollinosa* Williston, July 10 (Kincaid); December 24 and March 6, on sea-weed (F. M. Jones).

## AGROMYZIDÆ.

*Phytomyza* sp. January 27, February 24 (F. M. Jones).

*Agromyza æneiventris* Fallen. July 1 (Kincaid).

*Agromyza pusilla* Meigen. July 5 (Kincaid).

*Agromyza maculosa* Malloch. May 17 (F. M. Jones).

*Desmometopa m-nigrum* Zetterstedt, May 9 (F. M. Jones).

*Milichiella lacteipennis* Loew, (*Ophthalmomyia lacteipennis*). July 6, 12 and 28 (Kincaid); Spanish Point, July 5 (Spaeth).
