

- 4 There are numerous species which have been collected in countries neighbouring Switzerland, or even near its border. We mention here only: *Ischiolepta crenata* (Meigen, 1838), *Lotobia africana* (Becker, 1907), *Crumomyia gelida* (Hackman, 1965), *Norrbomia hispanica* (Duda, 1923), *N. nitidifrons* (Duda, 1923), *Spelobia czizeki* (Duda, 1918), *Spinilimosina brevicostata* (Duda, 1918). Numerous species of *Leptocera* (*Rachispoda*), recorded and described by ROHÁČEK (1991) from Europe, should occur also in Switzerland.
- 5 This list is based on the following collections: CAS, HNHN, MHNG, MHNN, CGB, CSP (part of the collection of S. Prescher, Braunschweig, originating from Limpachtal SO).
